

SEA THE WORLD

WITH ENRICHED AIR NITROX

Dear Diver,

**Thanks for signing up to the PADI
Enriched Air Nitrox course with us.**

This course will qualify you dive to use Nitrox Enriched Air up to 40% oxygen within your cylinder allowing you stay deeper for longer. Nitrox is often referred to as 'the future of diving' as it is regarded by some as safer and better for you. However there are a few important rules! You will receive your eLearning code within 72 hours of booking your course. Could you please ensure that you have completed all the eLearning before your course.

When we meet up then we will show you how to analyse your cylinder, how to log the dive and how to set the Nitrox setting on a dive computer before sitting a short multiple choice exam.

Please remember to bring the following items:

[PADI Medical](#)

[PADI Liability form](#)

PADI certification card

Log book

eLearning completion record

Thanks again and we look forward to seeing you soon and continuing your underwater

SEA THE WORLD

**Why not join our
new dive club?**

Our new dive club gives you many benefits including discounts, first refusal on dive trips and holidays.
